EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION:

On page 3, line 4, "Figure 1" has been changed to --Figure 2--.

The above change to the specification has been made to correct a typographical error.

REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 5,214,740 to Carroll. The improvement comprises a liquid spraying apparatus and method of controlling condensation in the apparatus with a heat exchanger that transfers heat energy from the heated fluid to the compressed air, thereby elevating the temperature of the air sufficiently that upon decompression and driving of the device the temperature of the air remains higher than an ambient dew point for the purposes of providing a non-hazardous heating system proximate a point at which the air decompresses.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patent to Carroll is cited for the showing of an apparatus similar to applicant's but lacking the proximate fluid heat exchanger.

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of two patents.

Johnson and Bok et al. are cited to show liquid spraying apparatus with condensation control.
